ITC LAB #05(A)
LAB TASK

- Write a program that ask the user to enter a integer and tell us if the entered integer is positive or negative **(Do it using if-else statement)**

- Write a program in C++ that ask the user to enter radius of circle and the operation to be performed. print the output accordingly. **(Do it using if-else if-else statement)**

Operation list

$$Area=\pi r^2$$
$$Diameter=2r$$
$$Circumference=2\pi r$$

- Write a program that takes two numbers from the user and operation that user want to perform and display the result accordingly. **(Do it using Switch Statement)**

  - Addition
  - Subtraction
  - Division
  - Multiplication
  - Modulus
