ITC LAB #04
LAB TASK

1. Write a program that takes two numbers and perform all arithmetic operations.
   - Addition
   - Subtraction
   - Division
   - Multiplication

2. Write a program that takes length and breadth of a rectangle and find its area.

   Area=length*width

3. Write a program that takes radius of a circle and find its diameter, circumference and area.

   Diameter, circumference and area of a circle formula is given by

   $D=2r$

   $C=2\pi r$

   $A=\pi r^2$

4. Write a function that takes quantity in pounds and convert it into gram and kilogram.

   1 Pounds = 0.454 kilograms

   1 Pound = 453.59237 Grams
